Soaking

Beating

Pressing and
Drying

Finished Product

Implementing Strategies

A. Buy Back of Organic Products (organic rice, coffee, root crops and other crops)

Assured buying price of organic rice

Shade Grown Organic Coffee

organic

Organically grown without the use of Chemicals and Pesticides. Farmers help in building healthy soils and preserves biodiversity in the Rainforest.

shade grown

Organic Farming practices promote shade grown coffee trees resulting in the increase of forest covers, at the same time protecting the water shed areas that provide clean water source to Negros Island.

local

Locally grown from the last remaining Rainforest area of Negros Island

quality

Made from selectively handpicked ripe red coffee cherries following strict quality control system for Organic Coffee production.

tastes

As the coffee beans mature more slowly in the shade, natural sugars increase and enhance the flavor of the coffee.

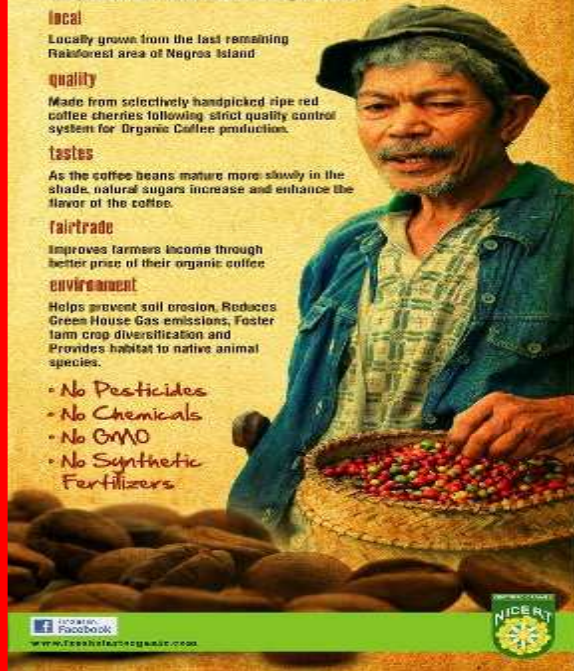

fairtrade

Improves farmers income through better price of their organic coffee

environment

Helps prevent soil erosion, Reduces Green House Gas emissions, Foster farm crop diversification and Provides habitat to native animal species.

- No Pesticides
- No Chemicals
- No GMO
- No Synthetic Fertilizers
